## **ZMB BRAUN GmbH: Restart officially secured – insolvency proceedings concluded**

[Friedrichshafen, 15 November 2024] - Good news from Ravensburg: **The restart of ZMB BRAUN GmbH is officially secured. With the decision of the district court of Ravensburg on November 15, 2024, the insolvency proceedings were repealed after the legally binding confirmation of the insolvency plan. This successfully completes the restructuring of our company.**

We reported on the positive progress and secured future of ZMB BRAUN GmbH in October. Now, Managing Director Andreas Treut and the entire team are looking forward to a promising future: “Today's decision marks a decisive milestone in the history of our company. We are ready to take off together and focus on the opportunities that lie ahead.”

We would like to express our particular gratitude to our entire team, who have actively supported us with great commitment and dedication during this challenging time. We would also like to thank our advisors from Luther Rechtsanwaltsgesellschaft mbH, the team from RSM Ebner Stolz, the insolvency monitor from WINKLER & PARTNER, and the Ravensburg insolvency court, who have supported the process with their expertise and trusting cooperation. Together, we have set the course for a stable and successful future.

The positive results were made possible above all by the good and constructive cooperation with the works council of ZMB BRAUN and the IG Metall trade union. Managing Director Andreas Treut expresses his sincere thanks for this: “Openness, honesty, respect and transparency are central values of our corporate philosophy. When all sides work together in this spirit, results are achieved that benefit both the employees and the company.”

The successful implementation of the insolvency plan and the future-oriented restructuring show that ZMB BRAUN GmbH has emerged from the crisis stronger than before. With a clear focus on stability, innovation, internationality and customer satisfaction, the company is ideally positioned to establish itself in the industry in the long term.
